Contribution asked

Contribution is open. Please consider first the aim of the declaration as described below before sending your contribution. If you want to review the SD itself and propose new formulations, don't hesitate. A few key questions directly related to the content of the Sustainability Declaration are suggested here to guide your contribution if needed:

1. Do you want other main messages? What would be your own proposal?
2. If you agree that messages must be given for the review of SGD 6 to the High Level Political Forum to be held in the United States in July 2018, what are the messages that you want the SD to carry?
3. How far do you consider that there is a risk of non-achievement of the SDGs in due time based on current trends and business as usual policies?
4. Do you consider that progress is needed for a holistic approach? Is it a key issue? How do the individual targets of SDG 6 contribute or not to achieve Sustainability? How the failure on the fulfillment of other SDGs will impact the achievement of SDG6?
